COVID-19 Student Health Screening Checklist

*** Keep this form as a reference for your daily screening***

Student Screening

Please make sure you conduct the following screening with your child each morning before they go to school.

Symptoms – Does your child have any of the following symptoms?

Yes No

- Temperature 100.4 degrees Fahrenheit or higher when taken by mouth
- Sore throat
- New uncontrolled cough that causes difficulty breathing (for students with chronic allergic/asthmatic cough, a change in their cough from baseline)
- Diarrhea, vomiting, or abdominal pain
- New onset of severe headache, especially with a fever

Close Contact/Potential Exposure

- In the past 14 days, has your child had close contact (within 6 feet of an infected person for at least 15 minutes) with a person with confirmed COVID-19 Yes No
- In the past 14 days, has your child traveled internationally (must quarantine for 14 days upon return) Yes No

If the answer is **YES** to any of these questions, parents should keep their child(ren) home from school. They should call the school to let them know why their child will be absent (517-448-8912, Lincoln Elementary ext. 248 or 242; MS, JR/SR HS ext. 240).

If they are symptomatic or if they have had contact with a COVID-19 individual, they should also call their healthcare provider right away to determine if testing is needed. If they do not have a healthcare provider, they may contact the Lenawee County Health Department at (517) 264-5226, Option 5 to speak with a Public Health Nurse (Monday – Friday 8:00am – 4:30pm).

If the answer is **YES** to any of the symptom questions, but **NO** to any close contact/potential exposure questions, your student may return based on the guidance for their symptoms (see "[Managing Communicable Diseases in Schools](#)"):

- Fever: at least 24 hours have passed with no fever, without the use of fever-reducing medications
- Sore throat: improvement (if strep throat: do not return until at least 2 doses of antibiotic have been taken);
- Cough/Shortness of breath: improvement
- Diarrhea, vomiting, abdominal pain: no diarrhea or vomiting for 24 hours
- Severe headache: improvement

DISCLAIMER: This screening tool is subject to change based on the latest information on COVID-19.
